Imprint™ 4

- Superfast setting A-silicone with active self-warming.
- Short intraoral setting time from 75 seconds.
- Chemical reaction causes material to actively and quickly warm up to body temperature after working time, substantially accelerating the intraoral setting without affecting the working time.
- Super-hydrophilicity for excellent flow and fine detail reproduction.
- Pleasant mint flavour.

FROM £58.79

For full range of Imprint™ 4 see the Henry Schein Dental Catalogue page 62

Filtek™ Supreme XTE

- Universal restorative material based on nanotechnology, gives excellent strength with natural gloss.
- Simple to use with exceptional handling - indications include direct anterior and posterior restorations Class I-V, indirect inlays, onlays and veneers.
- Nanofiller technology provides a better polish retention than a microfill combined with an outstanding strength.
- More shades for single-shade restorations give lifelike aesthetics.
- Improved fluorescence.

FROM £22.50

For full range of Filtek™ Supreme XTE see the Henry Schein Dental Catalogue page 243

Filtek™ Bulk Fill Posterior

- Bulk fill restorative material for use on direct anterior and posterior restorations.
- Indications include: base/liner under direct restorations; core build-ups; splinting; indirect restorations (including inlays, onlays and veneers); restorations of deciduous teeth; extended fissure sealing in molars and premolars; repair of defects in porcelain restorations; enamel and temporaries.
- No capping layer for a one-step placement meaning reduced procedure times and no additional costs of capping layer materials.
- Excellent adaptation without expensive dispensing devices, use with regular restorative capsule dispensers or in syringe format.

ONLY £33.99

For full range of Filtek™ Bulk Fill Posterior visit henryschein.co.uk

Filtek™ Z500

- Visible light activated, direct restorative nanocomposite.
- Indications include direct anterior and posterior restorations, core build up, splinting, indirect restorations including inlays, onlays and veneers.
- Long lasting polish retention.
- Low wear.
- Excellent strength and handling.

FROM £23.29

For full range of Filtek™ Z500 see the Henry Schein Dental Catalogue page 231

Adper™ Prompt L Pop

- All-in-one light-curing adhesive for compomers and composites.
- Etching, priming and bonding in one step.
- Fast way to achieve adhesion to enamel and dentine.
- Yellow colour.

Normal Pack x 40
203781 **£51.49**

TRANSCODENT

SAVE 25%

- Applicator tip which has a honey stirrer-style head that allows gels/liquid to be picked and precisely applied in hard-to-reach areas without fibres to contaminate the surface.
- 100% fibre-free, will not contaminate the restoration site.
- Rigid handle with a soft pliable head.
- Exact amount of material dispensed every time.
- Handle bends and holds it shape.

Intro Kit

Assorted Colours x 400

1132416 £25.49

HybenX®

EPIEN SRL

ONLY £35.00

- HybenX - Anti-biofilm tissue treatment - patented formula to remove the stubborn plaque biofilm and kill the bacteria associated with it.
- Works by desiccation - absorbing the moisture from the plaque biofilm.
- HybenX also has anti-microbial, haemostatic and anti-inflammatory properties.
- Works on soft and hard tissue - can be used to treat gingivitis, ulcers, mild and severe periodontitis.
- Softens calculus - saving clinical time on scaling.
- Use before and after routine scaling and root planing for removing plaque biofilm from tooth and gum surfaces in hard to reach places.
- Use in conjunction with conventional treatments to help gain control in cases of peri-mucositis and peri-implantitis.

Tooth Mousse

GC

- A water-based, sugar-free topical cream containing Recaldent™ CPP-ACP. When applied to tooth surfaces it binds to biofilms, plaque, bacteria, hydroxapatite, and surrounding soft tissue localising bio-available calcium and phosphate. Saliva enhances the effectiveness and the flavour helps stimulate saliva flow.
- Provides extra protection for teeth, helps neutralise acid challenges from acidogenic bacteria in plaque. Professional applications include: after ultrasonic or hand scaling and root planning; following professional tooth cleaning; after application of topical fluoride; to provide a topical coating for patients suffering from erosion, caries, and conditions arising from xerostomia.

Order anytime - our website is open 24/7 365 days a year for your convenience.

NEW

Order forecasting - Use our new Order forecasting tool to assist you and help you know what to order and when based on your previous purchase history.

"As Clinical Manger of Stratford Dental and I do the stock ordering at the practice. I have used several dental companies and ordering systems over the last 10 years and I was dazzled by Henry Scheins personal and professional approach. They demonstrated how to use the online ordering system and its comprehensive visually full of information and easy to use, but if there is a problem there is always our friendly rep to help or many people on the end of the phone in the customer service centre or the online order department."

Jo Hedderman
Practice Manager, Stratford Dental Centre Ltd

"Online ordering is never easier than on Henry Schein! You can search by product name for any new product you wish to order or go into the category it would appear in. Products are easy to find and cost of item is also put along side so you know what you're paying before you order.
It saves your order history so you can just click on this and re order products with ease and simplicity."

Liz Whatmore
St.Pauls Square, Birmingham

"I find the online ordering system from Henry Schein very easy and quick to use. When I do my stock checking I do a check but I then go through our order history online to make sure I haven't forgotten anything. It's good in the fact that it shows the picture of the products and also rather than wading through the catalogue it's quicker to search it on the system. If I do have any queries or problems Nehsa is always at the end of the telephone with help and guidance. She's also a nice friendly face when she calls in to see us."

Sandra
Prestige Dental, Bedworth

HENRY SCHEIN®
DENTAL | EDUCATION & DEVELOPMENT

2 HOURS VERIFIABLE CORE CPD

DECONTAMINATION & HTM 01-05

Recommended for the whole dental team

The latest regulations can be interpreted in many different ways and understanding what should be done can be very misleading. Attend this evening seminar to gain a clearer understanding of HTM 01-05 and what it means in everyday practice; find out what are 'essential requirements' and what is 'best practice'?

This informative seminar will discuss:

- Water quality in surgery.
- Maintaining an effective working environment.
- Decontamination room requirements.
- Instrument decontamination and validation.
- Sterilisation requirements.

Learning outcomes

1. The principle of infection control.
2. Transmission methods of infective agents.
3. Pathogen groups bacteria, viruses and prions.
4. Practical implementation of HTM 01-05 - Maintaining an Effective Working Environment.
5. Practical implementation of HTM 01-05 - Instrument Decontamination.
6. Practical implementation of HTM 01-05 - Dental Unit Water Lines.
7. Practical implementation of HTM 01-05 - Hand Hygiene.
